

**FOR IMMEDIATE RELEASE**

## **Nutraferma<sup>®</sup> Enters Distribution Agreement with Carval<sup>®</sup> Company**

**Nutraferma's biotech products are now available to producers in several Latin American countries after entering distribution agreement with Carval Company**

N. SIOUX CITY, SD – May 19, 2014 – Nutraferma, a leading innovator of biotech solutions, has entered a distribution agreement with Carval Company. Through this agreement, producers in Colombia, Ecuador, Dominican Republic, and Mexico will be able to benefit from Nutraferma's high-quality feed ingredients and biotech products. Nutraferma utilizes solid-state fermentation technology to produce a functional soy-protein ingredient with high protein content and reduced anti-nutritional factors.

“We are very excited about the opportunity to work with Carval Company,” said Eric Lohry, President of Nutraferma. “This new venture will allow producers in the swine, poultry, and aquaculture markets of Latin America to utilize our technology to optimize productivity in their livestock.” Lohry went on to say, “We believe that Carval's commitment to technical support and service excellence makes them a perfect match for our company.”

Carval Company will begin distributing Nutraferma's products immediately. Carval distributes an extensive line of animal health products to manufacturers in 15 different markets. Nutraferma manufactures high-quality proteins and microbials that are proven effective by university and field research. For detailed information on Nutraferma's full product line, visit [www.nutraferma.com](http://www.nutraferma.com).
